Your admitted relationship with law enforcement, combined with your support of Biggs when he threatened to have brothers arrested, and your willingness to turn yourself in... leads alot of us to believe that you may have some reason to be confident the law is not a threat to you. The rest of us dont have this level of faith and trust in the pigs.

I admitted to talking to them about our movements in DC. And not on this last trip...that's not a secret. Never was. Anyone who has ever planned something with me knows I contact local LEO to keep a level of separation between the groups.
